Should we make a big thing out of our tiny TipCover?

Like so often in life, small things can make a big difference. Our TipCover is such a small thing. A tiny one, actually. Its 6 sizes range from 28 to 36 mm length.

Yet TipCover is perfectly equipped to do what it is intended to do. It protects the sensitive tips of your medical devices such as implants or surgical instruments from damage. We won't make a big thing out of this. It's a tiny thing, after all. Although one with big benefits.

PRODUCED IN CLEANROOM

Produced in cleanroom, it's suitable for sterile as well as non-sterile applications.

Evenly important, it protects product users from injuries that sharp edges or tool tips can cause so easily. And when customer can't get hurt, that won't hurt your customer relations either.

100 % SILICONE-FREE

Tip Cover is silicone-free. No silicone can get in contact with patients.

Perfect tip protection

TipCover

Perfect tip protection for sensitive tools or implants. 6 sizes cover many common product diameters.

TipCover —
protects sensitive
tips from people.
And protects sensitive
people from tips.

THE ADVANTAGES AT A GLANCE:

- Ideal for the protection of tips and edges of surgical instruments
- for sterile and non-sterile applications
- secure loading and removal
- easy handling
- safe transportation
- 6 sizes available for various diameter ranges

Product Range

Article	Outer dimensions W x H x D	Suitable for diam.
